AlterMed Introduction and Disclaimer for AlterMed Meet-up Speaker Sessions

AlterMed Research Foundation is dedicated to the promotion of scientific research and education of complementary and alternative medicine (or integrative medicine) to manage, treat, and prevent human chronic illness & cancer, and to promote healthful living. We bridge evidence-based Complementary & Alternative Medicine (CAM) to conventional medicine by promoting quality research and education. We also host quality evidence-based medical conferences for physicians, nurses, allied professionals, students, and the public. We welcome the opportunity to learn about the wealth of CAM techniques that are currently available and hope to identify those most suited to undergo evidence-based research. With our world-renowned advisory board with both CAM and conventional research review as well as clinical expertise - we ensure quality CAM research is conducted, peer-reviewed, and meeting highest conventional research standards; thus enabling more proven medical options to be discovered for cancer and chronic illness.

The intent of the AlterMed Meet-up group is to network, informally share ideas, services, referrals, personal experiences, research, and possible therapies to be researched. AlterMed does not and is unable to refer attendees to any speaker/health practitioner or endorse any speaker and his/her trade practices, products and/or treatments. AlterMed has not evaluated any medical claim and has no opinion on any such claim which may be made by the speakers. One assumes his/her own risk for purchases and/or treatments. Please consult with a physician for the diagnosis, treatment, cure or prevention of any disease. AlterMed expressly disclaims any liability and undertakes no responsibility for the actions or inactions of any speaker.

AlterMed employees or volunteers, expressing opinions of any speaker, his/her presentations, trade practices, products and/or treatment, are speaking on their own behalf and may not represent the position of AlterMed.

For evaluating therapies for best research practices and scientific evidence, please see www.AlterMedResearch.org/info/Research_Reference_Guide.pdf
